

AMENDMENTS TO THE CLAIMS

Please amend the claims as follows.

1. (Original) A method of transmitting monitoring information from a monitoring site to a remote site, comprising receiving monitoring information at the monitoring site, processing the monitoring data to form a human viewable representation signal and transmitting the human viewable representation signal to a remote site.

2. (Original) A method as claimed in claim 1 further comprising receiving the human viewable representation signal at a remote site and displaying the signal as a human viewable representation.

3. (Original) The method as claimed in claim 2 further comprising transmitting control instructions from the remote site to the monitoring site.

4. (Amended) The method as claimed in claim 2 ~~or claim 3~~ further comprising processing the human viewable representation at the remote site to derive monitoring data.

5. (Amended) The method as claimed in ~~any preceding~~ claim 1 in which the monitoring information is processed to form a human viewable representation signal by computer.

6. (Original) A method of receiving monitoring information from a monitoring site at a remote site comprising receiving, at the remote site, a human viewable representation signal representing the monitoring information and displaying the human viewable representation of that monitoring signal.

7. (Amended) The method as claimed in ~~any preceding~~ claim 1 in which the monitoring information is test information for example vehicle or vehicle component monitoring data.

8. (Amended) A computer program comprising a set of instructions configured to implement a method as claimed in ~~any of claims 1 to 7~~ claim 1.

9. (Original) A computer configured to run under the instructions of a computer program as claimed in claim 8.

10. (Original) A computer readable medium storing a computer program as claimed in claim 8.

11. (New) The method as claimed in claim 3 further comprising processing the human viewable representation at the remote site to derive monitoring data.

12. (New) The method as claimed in claim 2 in which the monitoring information is processed to form a human viewable representation signal by computer.

13. (New) The method as claimed in claim 3 in which the monitoring information is processed to form a human viewable representation signal by computer.

14. (New) The method as claimed in claim 4 in which the monitoring information is processed to form a human viewable representation signal by computer.

15. (New) The method as claimed in claim 11 in which the monitoring information is processed to form a human viewable representation signal by computer.

16. (New) The method as claimed in claim 6 in which the monitoring information is test information for example vehicle or vehicle component monitoring data.

17. (New) A computer program comprising a set of instructions configured to implement a method as claimed in claim 6.

18. (New) A computer configured to run under the instructions of a computer program as claimed in claim 17.

19. (New) A computer readable medium storing a computer program as claimed in claim 17.
